

	USA (52)	UK (48)	Germany (51)	Taiwan (45)	China (51)
Digital	Several digital companies started in the US, such as Apple, Boeing, and Microsoft. These companies have spreaded all over the world, with successful branches. The USA is also home to several social networking platforms that are widely used across the world. (9)	The UK's digital world may not to be as big compared to the US. However, its advance in technology is pretty advanced and not to behind, but are more less known. (6)	Germany has not had that much recognition in the digital industries, but their manufacturing industry works along with the digital industry creating new technology. (7)	Taiwan has held several patents during the 20th century. It has been ranked higher than some G20 countries of how much patent was granted by the government. (8)	China has had several digital industries due to the mass population in China. The digital industries has been blooming with foreign investors that cooperate with China's technological advances. (9)
Culture	The US culture has been very broad due to the diverse population of the people in US. However, the US has had a blend of different cultures attracting several tourists to visit different types of culture at one place. (8)	The UK's culture been viewed and generalized by the impression of being sophisticated, polite, and proper. The culture of the country has had several long histories behind it, attracting several tourists to the country as well. (9)	Germany's culture from transitioning of a divided Berlin to a prosperous and hub of culture has been swift. The country has had several history behind the development of a country, also attracting several tourists. (8)	Taiwan's culture has been very diverse with aboriginals, Chinese immigrants, and other clans. Despite the diverse population, the country has not advertised its culture that much. (7)	China's long history has been known to several, which is why several tourists today visit China. Their culture has been widely known through textbooks, stories, and artifacts. (9)
Enterprise	US's enterprise has been large and branched throughout the world. The investments have been high and with several companies being created in America. (10)	UK's enterprise has also been widely spread, but not as big as the US's industries. Furthermore, its exports have not been abundant with power resources. (8)	Germany's enterprise has been wealthy with manufacturing goods with car companies, such as the Mercedes and the BMW. Their engineering prowess has also been high in the rankings as well. (9)	Taiwan's enterprise has been big within the country. However, when compared to the rest of the world it only seems to trade off with China the most. (7)	China's enterprise has had a profound impact on several countries. Several countries has cooperated and made products all in China. Allowing to have high power. (10)

<p>Engagement</p>	<p>The US's engagement in foreign affairs may be controversial between nations and within the country as well. However, the country has engaged with other countries as a pro too. (8)</p>	<p>The UK's strong engagement in foreign relations with US has been helping the country and receiving stronger soft power. (8)</p>	<p>Germany's dedicated engagement with the European Union, UN, and the G7 has allowed itself to become a strong country with good relations. (9)</p>	<p>Taiwan's engagement with foreign relations has been weak due to several countries not recognizing Taiwan as a true country. However, the Holy See and other countries still do keep relations. (6)</p>	<p>China's engagement with other countries mostly seem to stand neutral and do not wish to engage too much. However, the country has both helped and has had disputes with other Asian countries over land before. (8)</p>
<p>Education</p>	<p>Several top universities across the world are located in the USA. The universities have also been attracting several international students across the world. (9)</p>	<p>The UK has also had top universities such as Cambridge or Oxford. The country has had great progress in education. (9)</p>	<p>Germany's education has also been high with a literacy rate of 99%. This shows the firm education system in Germany. (9)</p>	<p>Taiwan has had a strict education system with a required 12 year education, along with standardized tests for middle school and high school. Literacy rate: 98% (9)</p>	<p>China has had several branches of American universities in China, such as NYU. The country has a literacy rate of 95% due to the vast population which is harder to monitor. (8)</p>
<p>Government</p>	<p>The government of the US has been represented as a symbol of democracy. However, recent years more and more corrupted officials are discovered, along with the disagreement of the US spying on its own civilians. (8)</p>	<p>The UK has had meeting aid commitments of 0.7% of GDP and also issues surrounding immigrations. The UK possibly leaving the EU has had disagreements as well. (8)</p>	<p>Germany has had a steady and stable govern in its home. The chancellor of Germany, Angela Merkel, has also been very popular within the nation. (9)</p>	<p>Taiwan has had a government that has recently been criticized by the people after being elected the 2nd time. This has created vast disagreements between the running parties. (8)</p>	<p>The government of China has had several violations among human rights such as censorship, freedom of speech, freedom of expression, and the press. This has cause disagreements among the people. (7)</p>

Recommendations for Taiwan: Taiwan should increase their culture such as through music, food, and history. Most foreigners do not know the Taiwanese culture and often relate it to China. Taiwan should advertise the mountain hikes or the different night market food as well. Taiwan's foreign relation and engagement is still in need of improving, as several countries are starting to recognize China as the true representative. However, that is not something that can be done as fast as advertising Taiwan's vast culture.
